

PRESS RELEASE

Ciena joins the Spanish Association for Digitalization, DigitalES

- Ciena has operated in Spain for two decades and is now leading service provider's transition to more adaptable telecommunications networks

Madrid, 10 February 2022.- Ciena, a pioneer in the networking industry with offices in more than 35 countries around the world, has joined **DigitalES, the Spanish Association for Digitalization**.

Ciena is a networking systems, services and software company, with worldwide expertise and recognition in the field of intelligent optical solutions, routing and switching, converged packet optical, management, automation and service. Ciena's technology supports 85% of the world's largest communications service providers, as well as regional service providers, submarine network operators, data and cloud operators, enterprises, public sectors, and all levels of education.

The company's Adaptive Network™ approach has been embraced by service providers across the globe and is enabled by three key capabilities: intelligent automation, real-time performance data, and continuous adaptation of the network to changing demands of bandwidth. In short, **Ciena** is focused on creating more intelligent, agile and responsive networks, optimizing the infrastructure and incorporating new technologies and working methods.

Ciena is the fourth new member of **DigitalES** since January, following the recent additions of Kyndryl, Gigas and ZENER.

DigitalES, the Spanish Association for Digitalization, represents more than 60 leading technology and digital innovation companies in Spain. Together, these entities' turnover is equivalent to more than 3.4% Spain's GDP. Our goal is to foster the digital transformation of citizens, companies, and public authorities, thereby contributing to the economic and social growth of our country.
